

Title: Putting the cart before the horse? Harnessing researcher development activities to impact institutional policy

Presenters: Dr Heather Sears

Affiliation: Doctoral College & Centre for Research Capability and Development, Coventry University

Record presentation: yes

Abstract:

The Research Capability and Development (ReCap) team at Coventry University leverage their activities to progress institutional strategy and policy. This presentation will consider three of our researcher development activities and how they are being harnessed to impact institutional policy: i) the development of a blended learning development programme for supervisors; ii) a support programme for UKCGE Supervisor Recognition applications; iii) the 'Trailblazers' scheme providing fully funded studentships and an opportunity for talented early-career researchers to lead a supervisory team and develop a doctoral project. An initial evaluation of 'Trailblazers' from the early-career researchers' perspective will be presented.
