“Who’s Who” Introduction

Onalytica has been creating Top 100 Influencer lists for the past 10 years, connecting brands with influencer communities. The marketplace is now looking to understand who is influential beyond Twitter social amplifiers. Over recent years there have been more and more companies producing lists based on Twitter followers. We want to break away from that.

Each Who’s Who report will provide you with the top Social Influencers, Content Creators, Event Speakers, Industry Analysts, Brand Employees, Brands and Publications across individual topics such as AI, Climate Change, The Future of Work, FinTech, Energy Policy, Obesity, etc.

The influential experts are selected using Onalytica’s 4 Rs methodology (Reach, Resonance, Relevance and Reference). Quantitative data is pulled through LinkedIn, Twitter, Personal Blogs, YouTube, Podcast, and Forbes channels, and our qualitative data is pulled by our insights and analytics team, capturing offline influence.

All the influential experts featured are categorised by influencer persona, the sector they work in, their role within that sector, and more from our curated database of 1m+ influencers.

We are striving for this report to be a One-Stop Shop for the Movers & Shakers of the industry so any feedback to further improve the lists is always gratefully received.

Risk Management Introduction

Risk management is a process of establishing decisions that will decrease adverse effects of numerous risks on an organisation. Risk management software aims to observe and identify a variety of risks which organisations could face due to various types of compliances. The main purpose is to identify a risk, lessen its impact and efficiently manage it.

To protect themselves from data security breaches, for example, organisations should consider investing in risk management. It allows for better decision-making, realistic expectations, prevented or reduced liability and protected public image.

This Who's Who report provides you with a varied sample of influential voices discussing risk management online. From Event Speakers, Industry KOLs to Researchers & Contributors, this list will help you find experts within the risk management conversation.

Brand Employees & Industry Practitioners

Listed below is a sample of influential voices from Enterprise brands. These people are prominent voices within the industry, and drive awareness & engagement for their employers around Risk Management.

Dark Reading
Ranking: 4

Methodology

Our Who's Who lists are created using the Onalytica platform which has a curated database of over 1 million influencers. Our platform allows you to discover, validate and categorise influencers quickly and easily via keyword searches. Our lists are made using carefully created Boolean queries which then rank influencers by resonance, relevance, reach and reference, meaning influencers are not only ranked by themselves, but also by how much other influencers are referring to them. The lists are then validated, and filters are used to split the influencers up into the categories that are seen in the list.

This Who's Who list should give you an insight into Risk Management and help break it down. We always want to make sure you are getting the most valuable information available from our lists, so feedback is always welcome!

If you want to learn more about Onalytica, or if you'd like to see our platform in action, feel free to get in touch!
